12 JAN 1965

Mr. Otto E. Guthe
Assistant Director

Because the project is considered to be of high national importance, we are requesting the support of the Central Intelligence Agency in providing the Geological Survey with available source material, up to and including SECRET, pertinent to this atlas effort.

Source materials would include classified data on mines, caves, oilfields, culture, and climate in the areas of interest. The necessary arrangements for transfer or loan of classified data can be made between Dr. Verne C. Fryklund, Jr., of the Geological Survey and a designated member of your organization.
